

Tuesday 21st March 2018

Dear Parents/Carers

As some of you may be aware, one of our pupils has been hospitalised with viral meningitis last night. Thankfully, she is doing well and is being treated with antibiotics and hospital supervision.

I have been in contact with our school nurse who has advised us on the guidelines for viral meningitis and there are no exclusions and no recommendations as viral meningitis is not contagious. If you do have any concerns about your child's health, please seek advice from a medical professional.

If you have any further questions or queries please contact the school office or myself headofschool@upaweaverham.org

Yours Sincerely

Ms S Titterton
